EDUCATION

Bachelor of Technology

GLA University

2023 - 2027

EXPERTISE

Web Developer

Python Developer

Content Writer

Content Creator

LANGUAGES

JavaScript

Python

Java

ABOUT ME

A Full-Stack Web Developer and a Computer Science major Student. I will make frontend and backend to your app with a connection to database of your choice (MongoDB / PostgreSQL). Additionally, I will provide services for creating CI/CD infrastructure with deployment to cloud.

EXPERIENCE

I have developed website with the use of NEXTJS and Web-Sockets. Implemented User Interfaces, client logic, connecting to backend services and integrating NoSQL database. Optimised performance and deployed website to hosting services like VERCEL and NETLIFY.

I have developed multiple projects with Python like creating Bots using SELENIUM and used APIs to enjoy services of websites like NUTRIONIX, SHEETY and PIXE.LA. Also dealt with Python GUI using libraries like TURTLE, PANDAS and TKINTER.

PROJECTS

Chat-Application

Nextjs, Socket.io, MongoDB & Tailwind CSS

Made a real-time chat application where users can chat live which was maintained by Web-Sockets (Socket.io) and chats were also stored in MongoDB database which made them persist over there. I also used Next Auth in the project.

Blog-Application

Nextjs, MongoDB & Tailwind CSS

A Blog-application where users can write blogs with T-3 Stack. This Blog application was deployed on Vercel and is live now.

Link: <https://blog-app-five-coral.vercel.app/>

Discord Clone

Nextjs, Socket.io, Prisma, MySQL & Tailwind CSS

Discord Clone to expand my control over backend and understand the file system in which large projects maintained and deployed.

TECH-STACKS

Frameworks

Next.js
Flask
Node.js
Express.js
Tailwind CSS

Libraries

React.js
Selenium
Mongoose
Prisma
Shadcn/ui

Databases

MongoDB
PostgreSQL
